

## Testimonials

---

*"I was heartbroken when my vet told me to prepare for end of life of my 16 year old kitty. She was in renal failure, was lethargic and began hiding in the back of my closet. I had heard about Shanti Kai's products and purchased "Purrfect Sense" in the hope that it might give her some comfort. She seemed to welcome the essence as I rubbed it into her coat and on her ears. A gradual change came over her and it seemed her spirits lifted. She came out of hiding and welcomed attention again. She also began to respond to her medical treatment again. I am happy to say she is still with us and is back to her old self. I continue to rub "Purrfect Sense" into her coat daily as she happily purrs. I am excited to try other essences with her. Thank you for giving her comfort when she needed it most." - Carita*

*"Purrfect Sense has been a game changer with out new rescue cat. We adopted him with multiple health issues - including FIV, many of these health issues has since subsided (he still has FIV). But the best thing that Puurfect Sense has helped with is his personality. When we first got him, he was extremely aggressive with our dog and our toddler and would howl early in the morning and during the day. So we started using several drops on top of his food every feeding every day. Not only has his aggressive and territorial tendencies gone away, but the howling has almost stopped!" - Sarah*

### Purrfect Sense™

### A Balancing Essence For Cats

The Science of Vibration...  
The Art of Healing™

## How does Purrfect Sense™ Essence Work?

Flower Essences have been used since the 1930's to help restore balance to the body's energy field. Shanti Kai™ Essences are unique in that they contain carefully crafted blends of Hawaiian flowers and gemstones, drawing from an ingredient base of over 400 individual essences (also offered on our website). In Western Medicine, we attempt to heal at a symptomatic level or by eradicating disease through surgery or medications. Shanti Kai Essences are based on the "science of vibration" and seek to alter the subtle energy fields in the four bodies (physical, mental, emotional, and spiritual) so that they resonate according to their optimal health levels.

Our pets live in the environment we create for them, often experiencing the same stress that we do, and they can become energetically imbalanced the same way we do. Pet Essences offer a safe, gentle alternative for balancing stress. While you may see immediate benefits when using Shanti Kai™ Essences, it is important to remember that essences work best with consistent use over time.

## About Purrfect Sense™

Our proprietary Purrfect Sense™ Feline Essence contains a carefully crafted blend of healing-focused gemstone and flower essences that are specially designed to be balancing for cats. A few sample ingredients include:

**Rose Quartz:** Calming, peaceful, and may especially benefit male cats that can't get along with others or have bad habits.

**Scarlet Pimpernel:** Promotes playfulness and happiness, and increase nature connection.

**Garnet:** May help with strengthening/stamina, and may help animals with illnesses find the will to live.

**Spanish Clover:** May promote strengthening of the immune system, especially lower chakras which include the reproductive areas.

**Lisianthus:** Promotes sweetness and playfulness, especially good for cats with uneven temperaments.

**Echinacea:** May help promote immune system.

## Why Use Purrfect Sense™?

Essences are all about creating balance. When there is stress or trauma, illness or injury (including aging and stress accumulation), your pet's energy can become imbalanced, making it more difficult for him or her to recover and strengthen. Shanti Kai™ Hawaiian Flower and Gemstone Essences work on the subtle energy bodies of your pet and affect the physical body as a downstream event. Because our essences are vibrational, they do not pose the risk of allergy or overdose and are perfectly safe and easy to use.

## Applying Purrfect Sense™

Purrfect Sense™ Essence may be added to cat's water bowl, applied topically along the outer flap of the inside of the ear or to the scalp or under chin and rubbed in. For the latter two, simply move fur away and add a few drops directly so it gets into the skin. As a spray, suggested uses include spraying on or around your cat or in areas where your cat likes to lie. Felines under stress or duress can have repeated dosages every 15-30 minutes as needed until symptoms of stress subside.

**NOTE:** It is important to consider diet, exercise, water intake and other factors when using essences.
